

Framing: raising the discussion

- Reflection of problem framing
- Ideation of outcomes
- Discussion of data governance concept

Researchers

- Ethical clearance
- Types of informed consent

Practitioners

- Providing judgment on ethical boundaries in their context

Enacting: putting the plan into place

- Processual informed consent
- Co-produced knowledge (beyond "traditional" data)
- Documentation of change
- Revise the data governance concept

Researchers

- Data collection
- Curating data
- Data anonymization
- Setting up access mechanisms

Practitioners

- Providing data and context
- Voicing requirements regarding their data
- Reflecting on research results

Evaluating: re-assessing & next steps

- Select and remove data
- Define data repository and/or archive
- Define access criteria
- Revise the data governance concept
- Reinforce relationships for next projects

Researchers

- Explore data repositories beyond academia
- Implementing archiving strategy
- Training practitioners on data use

Practitioners

- Curating data in non-academic repositories
